First, press win + I to launch the charm bar, and click Change PC Settings at the bottom.

Then, go to **General**, and scroll to the bottom of the page, click **Restart Now** button under **Advanced Startup** section. Remember to save all your work first before clicking it.

Note that on Windows 8.1, the Advanced Startup option has moved to Update and recovery section under Recovery.

The computer reboots to a startup menu, in which click **Troubleshoot**.

And click Advanced Options at next screen.

Choose Startup Settings next,

And click Restart button.

The computer reboots and prompts another menu to choose. One of the items is to **Disable** driver signature enforcement. Press number 7 or F7 to continue booting to Windows 8 with digital sign enforcement disabled.

Startup Settings

Press a number to choose from the options below:

Use number keys or functions keys F1-F9.

- 1) Enable debugging
- 2) Enable boot logging
- 3) Enable low-resolution video
- 4) Enable Safe Mode
- 5) Enable Safe Mode with Networking
- 6) Enable Safe Mode with Command Prompt
- 7) Disable driver signature enforcement
- 8) Disable early launch anti-malware protection
- 9) Disable automatic restart after failure

Press F10 for more options

Press Enter to return to your operating system

And then I was able to get the Windows Security warning window offering me to install this driver anyway.

Windows Security

Windows can't verify the publisher of this driver software

- Don't install this driver software You should check your manufacturer's website for updated driver software for your device.
- Install this driver software anyway Only install driver software obtained from your manufacturer's website or disc. Unsigned software from other sources may harm your computer or steal information.
